12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use. This application is for a geothermal well with a production of 2.1 million lons per day. The withdrawal will be 2352 acre feet per year; however, the temperature water would be flashed with the net effect of 210,000 gallons day being beneficially used and the remaining water returned to the reserves only 235 acre feet per year is actually used. The application is coming with other applications. The total hot water-steam equivalent necessary for the other applications. Applicant SUNOCO Energy Development Company By S/Richard W. Arden. Agent Pso Industrial Way Sparks, Nevada 89431 APPROVAL OF STATE ENGINEER This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to other ground water development in the area.
